

Section 1

Incident INC-2391 affected the Payment API in production.

Redis connection timeouts rose sharply during peak traffic.

The Payments Team resolved it by resizing the pool.

The Gateway routes requests to the Payment API over gRPC.

PostgreSQL holds the ledger and the settlement records.

The Platform Team owns the Gateway and its runbook.

Section 2

Incident INC-2391 affected the Payment API in production.

Redis connection timeouts rose sharply during peak traffic.

The Payments Team resolved it by resizing the pool.

The Gateway routes requests to the Payment API over gRPC.

PostgreSQL holds the ledger and the settlement records.

The Platform Team owns the Gateway and its runbook.
